Inspection Checkpoint:
Proper tools, checklist key to inspecting used excavator
... **p. 29**

BLUE WORKS

WD-40 Company's new **Blue Works** line showcases eight industrial-strength, specialty maintenance products, including a degreaser, multi-purpose lubricant, penetrant and silicone. Formulated with a low surface tension and capillary action that penetrates into tight crevices, threads and seams, the Blue Works penetrant frees struck and corroded parts and inhibits rust and corrosion. The line's degreaser has a 5-foot spray that removes grease, oil, dirt and grime on engines, forklifts, gears, chains and other metal tools.

CLEAN FUEL

RCI Technologies' Emergency Fuel Transfer and Filtration Unit can be used to clean stored diesel fuel and transfer fuel between tanks. The portable unit has a FP 700 fuel purifier with a 8-gpm flow rate, a 12-volt, .5-horsepower motor, 10-gauge power cord with batter clamps, detachable hoses and a thermal protection circuit with on/off switch.

DIG SAFE

Designed for increased safety in pipelaying applications, **Hammer-smith's Flexx Right** bucket combines a flexible, mark- and impact-resistant high density polyethylene lower section with a steel frame and mounting ears. The 30-inch-outside-diameter bucket is available for major brands of backhoes and compact excavators.
