Mr. Robert Randle

Dear Mr. Randle:

As you know Detroit Public Schools has used your RCI Fuel Purifier products in our fleet for two years now. We have the model 1000 on all of our fueling dispensers at both facilities and also use RCI PCTU portable tank cleaning units at both of our terminals.

Also, since 2001 we have ordered your heater-equipped model RC 400-E on all of our new Freightliner and Thomas Built Buses. By using your product as extensively as we have, we have eliminated fuel contamination and water-in-fuel problems in our 420 bus operation. In the cold Detroit area, fuel problems were once a major source of bus downtime.

The RCI product was also responsible for saving us from an encounter with Michigan OSHA. A driver filed a complaint charging that the exhaust from our buses was unhealthful. We showed the MI OSHA inspector your product and how extensively we were using it and how clean the fuel was at the time it entered the engine. They did some testing and we received a clean bill of health, no fines.

We have never experienced a product malfunction. All automotive accessory devices should be as simple and effective as RCI products. All bus fleets should be RCI Purifier equipped like we are.

Sincerely,

Dale W. Goby, Executive Director
Detroit Public Schools
