

## **Recirculating cleaning system maintains fuel quality**

Automatic fuel cleaning and recirculating FRS-660 comes packaged as a pre-engineered

integrated system. Programmable unit accommodates applications ranging from 11 to 150 g.p.m. and single or multiple tanks. Contains no filters, elements, or cartridges to clean or replace. Suitable for use with fuel oil, class II, or class III combustible liquids having a flash point of 100 F° or higher. Weatherproof enclosure safeguards all devices, wiring, and plumbing. Suitable for wall or pad mounting. Removes over 95% of all free water and up to 98% of normal and natural contaminants, including sludge and algae.
