

## **FOR IMMEDIATE RELEASE**

### **RCI Introduces Automatic Chemical Injection System**

*New Option Enables Addition of Chemicals to Stored Fuel*

SAN DIMAS, Calif. – Jan. 19, 2010 – Fuel purifier manufacturer RCI Technologies introduces the Automatic Chemical Injection System, which provides a safe and easy way to add biocides and other chemical additives to stored fuel.

Equipped on RCI's fuel recirculating systems ("FRS"), the Automatic Chemical Injection System makes it possible to safely and easily inject chemicals directly into the fuel stream prior to it entering the fuel tank. This new option may be ordered on all of RCI's FRS units and may be retrofitted to existing FRS units.

For more information on this new option or RCI's fuel recirculating systems, call (800) 868-2088 or visit [www.rcitechnologies.com](http://www.rcitechnologies.com).

#### **About RCI Technologies**

RCI Technologies, founded in 1994, offers a complete line of diesel fuel purification products, which include the Universal Fuel Purifier™, the Portable Tank Cleaning Unit™ and the FRS 660 Automatic Fuel Recirculating System™. RCI's products are suitable for marine, industrial, trucking and bus applications, and they are used at pumping stations and fuel docks, by hospitals and various government agencies, and in the construction and agricultural industries.

RCI's fuel purifiers, which bear Green Clean Institute certification, utilize RCI's patented fuel purification technology, using no filters or moving parts. By removing 99.9 percent of water and up to 98 percent of dust, dirt and other natural contaminants found in all diesel fuel, RCI's products promote optimum fuel system efficiency and fuel economy, reduce engine down time and extend engine life.

For more information on RCI's products, visit [www.rcitechnologies.com](http://www.rcitechnologies.com) or call (800) 868-2088.
