

FOR IMMEDIATE RELEASE

RCI Technologies Now Offers Three Models of RPU Fuel Recirculating System

Remote pumping unit is now available in three flow rates

SAN DIMAS, Calif. – March 2, 2010 – Fuel purifier manufacturer RCI Technologies is now offering three models of its Remote Pumping Unit Fuel Recirculating System.

The FRS 660-RPU-UL is designed to automatically circulate and clean stored fuel, utilizing the customer's existing pump, on a preprogrammed schedule. The RPU is now available in three flow rates (in gallons per minute): 7 gpm, 40 gpm and 90 gpm.

As with all of RCI's fuel recirculating systems, the RPU uses RCI's patented fuel purification technology, with no filters or moving parts. They are used for primary fuel purification and remove 99.9 percent of water, including emulsified water, and up to 98 percent of the normal solid or particulate contaminants found in all diesel fuel.

RCI's fuel recirculating systems are UL 508A-listed and Green Clean Institute-certified, and the control system is housed in NEMA 4X, weatherproof enclosures. The system is equipped with alarms to alert the user in the event of pump failure, purifier high water level, system high pressure and flow switch.

For more information on the RPU or other fuel recirculating systems, call (800) 868-2088 or visit www.rcitechnologies.com.

About RCI Technologies

RCI Technologies, founded in 1994, offers a complete line of diesel fuel purification products, which include the Universal Fuel Purifier™, the Portable Tank Cleaning Unit™ and the FRS 660 Automatic Fuel Recirculating System™. RCI's products are suitable for marine, industrial, trucking and bus applications, and they are used at pumping stations and fuel docks, by hospitals and various government agencies, and in the construction and agricultural industries.

RCI's fuel purifiers, which bear Green Clean Institute certification, utilize RCI's patented fuel purification technology, using no filters or moving parts. By removing 99.9 percent of water and up to 98 percent of dust, dirt and other natural contaminants found in all diesel fuel, RCI's products promote optimum fuel system efficiency and fuel economy, reduce engine down time and extend engine life.

For more information on RCI's products, visit www.rcitechnologies.com or call (800) 868-2088.
