RCI Technologies Unveils 50 gpm Fuel Recirculating System for Larger Storage Tanks

SAN DIMAS, Calif. – October 20, 2011 – Fuel purifier manufacturer RCI Technologies introduces the FRS 660-50-UL Automatic Fuel Recirculating System.

The FRS is designed to automatically circulate and clean stored fuel at 50 gallons per minute on a preprogrammed schedule. The system is housed in a NEMA 4 key-lockable cabinet and is equipped with alarms to alert the user in the event of pump failure, purifier high water level, system high pressure and flow switch.

This FRS model is ideal for larger fuel storage tanks and is also available in a multi-tank version. As with all of RCI's fuel recirculating systems, the FRS 660-50-UL uses RCI's patented fuel purification technology, with no filters or moving parts. They are used for primary fuel purification and remove 99.9 percent of water, including emulsified water, and up to 98 percent of the normal solid or particulate contaminants found in all diesel fuel.

RCI's fuel recirculating systems are UL 508A-listed and Green Clean Institute-certified, and all electrical components and connections are housed in NEMA 4X, weatherproof enclosures.

For more information on RCI's automatic fuel recirculating systems, call (800) 868-2088 or visit www.rcitechnologies.com.

About RCI Technologies

RCI Technologies, founded in 1994, offers a complete line of diesel fuel purification products, which include the Universal Fuel Purifier™, the Portable Tank Cleaning Unit™ and the FRS 660 Automatic Fuel Recirculating System™. RCI's products are suitable for marine, industrial, trucking and bus applications, and they are used at pumping stations and fuel docks, by hospitals, data centers and various government agencies, and in the construction and agricultural industries. RCI's fuel purifiers, which bear Green Clean Institute certification, utilize RCI's patented fuel purification technology, using no filters or moving parts. By removing 99.9 percent of water and up to 98 percent of dust, dirt and other natural contaminants found in all diesel fuel, RCI's products promote optimum fuel system efficiency and fuel economy, reduce engine down time and extend engine life.

For more information on RCI's products, visit www.rcitechnologies.com or call (800) 868-2088.
