

FUEL PURIFIER 3000

PRODUCT NUMBER:

FP 3000

PRODUCT DESCRIPTION:

The RCI Technologies patented fuel purifier is a one-step unit that removes up to 99.8% of free water and up to 95% of other heavy contaminants that are found in diesel fuel. Even today's "clean" diesel fuel will easily become contaminated during transportation and storage. Unlike many other products on the market, the RCI Technologies fuel purifier performs this function without the use of a replaceable, changeable, or cleanable filter element or cartridge. By removing contamination immediately before the fuel enters the engine's filter system, you can keep your fuel clean, preserve fuel quality, and extend the life of your equipment.

The FP 3000 is designed for larger diesel fuel pumping and re-fueling stations, fuel transfer docks, and extra heavy-duty mobile, stationary and marine applications. Holds approximately 4 gallons of water and contaminants, takes approximately 40 seconds to drain completely.

PRODUCT FEATURES:

Product	Universal Fuel Purifier
Model	FP 3000
Nominal Flow	200 GPM (757.1 L/min)
In & Out Couplings	3" NPT
Top Port	1" NPT
Sensor Port	1/2" – 20 Straight Thread
Safety Feature	50 PSI (factory set) pressure release valve
Drain Port	1" NPT
Height	56.5" (1435 mm)
Width	15" (381 mm)
Gross Weight	139 lbs. (incl. mfg. hardware)
Sump Capacity	4 gal.
Finish	Polyester Black Powder Coat – 35 to 40 gloss
Options	Water Sensor Kit 1" M-F brass ball valve (drain)
